1.1 Create Up To 50,000 Geofences

The number of geofences you can create has increased from 5,000 to 50,000. The Geofence selection forms have been updated to accommodate the maximum number of geofences.

The Geofence Alerts Template form's Geofence selection has changed from a pull-down menu to a link that opens the Display Geofence Selection form. If you have already selected a geofence, the link will be the name of that geofence. If you have not selected a geofence, the link name is *Select a Geofence*.

* Geofence [Select a Geofence](#)

When the number of geofences exceeds 30, you can page through the records or click on an alphabetical quick-search.

1.2 Display a Custom Logo on the TeleNav Track Website

Master Administrators can upload and display their company's logo on the TeleNav Track website. The uploaded logo must meet the following criteria:

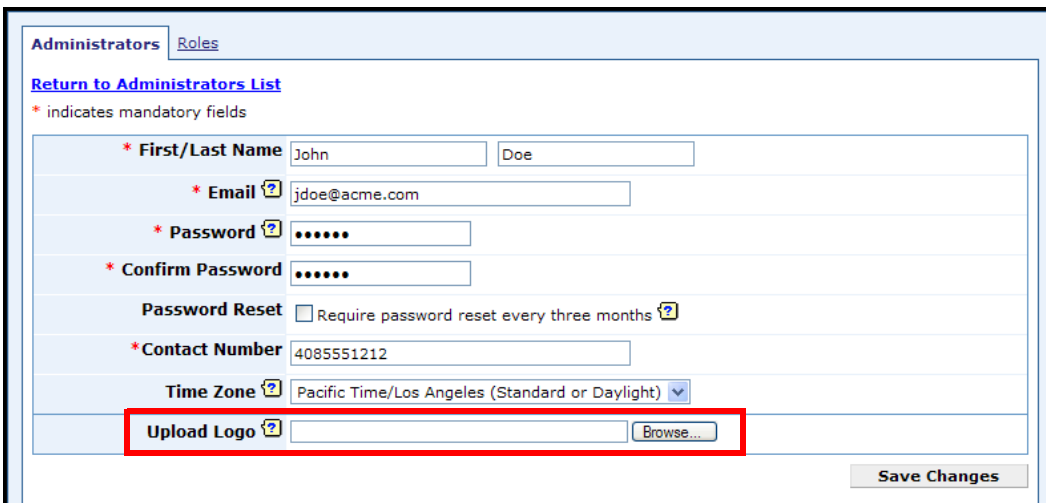

- Image dimensions must be 265 by 75 pixels.
- Image format of .bmp, .gif, .png, or .jpg.
- Image size can be no more than 10KB.

To add your company logo to the TeleNav Track website, do the following:

Step 1. Go to **Setup >> Company Settings >> Administrators & Roles >> Administrators**.

Step 2. Click on the Master Administrator to open the Edit Administrator page.

Step 3. Click **Browse** in the new *Upload Logo* field.

The screenshot shows the 'Administrators' page in the TeleNav Track website. The page has a header with 'Administrators' and 'Roles' tabs. Below the header is a 'Return to Administrators List' link and a note that '*' indicates mandatory fields. The form contains several fields: 'First/Last Name' (John Doe), 'Email' (jdoe@acme.com), 'Password' (masked with dots), 'Confirm Password' (masked with dots), 'Password Reset' (checkbox for 'Require password reset every three months'), 'Contact Number' (4085551212), and 'Time Zone' (Pacific Time/Los Angeles (Standard or Daylight)). The 'Upload Logo' field is highlighted with a red box, and the 'Browse...' button is visible next to it. A 'Save Changes' button is located at the bottom right of the form.

Step 4. Choose the logo (image) file.

Step 5. Click **Save Changes**.

You can change the logo by uploading another logo.

1.3 Report Enhancements

1.3.1 Exclude Weekends in Report Period

You can exclude weekends from the reporting period in the Daily Activity Report and Stop Report with the new *Weekdays Only* option on their Report Setup pages.

The screenshot shows a 'Reporting Period' form. At the top, there is a radio button for 'Today'. Below that, there are 'Start Date' and 'End Date' fields. The start date is '06/20/2010' (Sun, Jun 20 2010) and the end date is '07/20/2010' (Tue, Jul 20 2010). At the bottom of the form, there is a checkbox labeled 'Weekdays Only' which is checked and highlighted with a red rectangular box.

If you choose a period that includes weekends, the report will only include weekdays within that chosen period.

1.3.2 Daily Activity Report Setup and Format Updates

For the Daily Activity Report, the *Mileage Data*, *Wireless Forms*, *Speed Limit*, and *Time Settings* options can now be accessed by clicking the **Show Advanced Options** link in the Report Setup page.

The screenshot shows the 'Advanced Options' section of the report setup. It includes the following settings:

- Mileage Data:** Show daily mileage
- Wireless Forms:** Show Wireless Form data in report
- Speed Limit:** 65 MPH (Range from 1 to 150 MPH)
- Time Settings:**
 - Format:** 12-hour (10:00 PM) 24-hour (22:00)
 - Display:** hh:mm (8:30) decimal (8.5 hours)
 - Time Zone:** Pacific Time/Los Angeles (Standard or Daylight) [dropdown menu]

After running the Daily Activity Report with *Wireless Forms* selected, if you choose to export the report data to Excel, the file will include a second *Form Data* sheet.

1.3.3 Excel Output Update for Stop Report

After running the Stop Report, when you click Export to Excel, it opens the “Export to Excel - Select Devices” form, where you can click the new *Include Total* option.

Select	Device Name
<input checked="" type="checkbox"/>	All Devices
<input checked="" type="checkbox"/>	8530
<input checked="" type="checkbox"/>	9630
<input checked="" type="checkbox"/>	assigned
<input checked="" type="checkbox"/>	assigned0

Include Total

Cancel Export

This exports the report data to an Excel file that has two worksheets: Stop Summary Report and Stop Detail Report. The Stop Summary Report sheet contains the total stop time, longest stop time, and average stop time.

By default, without *Include Total* checked, the Excel file will have a single worksheet for Stop Detail Report.

1.3.4 Subscription Report for Admin Login Activity Report

The Admin Login Activity Report now includes a Subscription Report page so that report data is automatically sent to an email account, an FTP site, or both. The Subscription Report is privilege-based. Only the Master Administrator or other administrators with permission can set them up.

To set up a subscription report, go to **Reports >> Activity Summaries >> Admin Login Activity Report** and click the **Subscription Reports** link.

Report Setup Subscription Reports

Name this subscription report as: _____
Report results are sent in Excel format.

Set Frequency as: **Monthly**
1

Data Period: **This Month** [Last Month](#)

Save Subscription Report

For general information about Subscription Reports, click the **Support** tab and search on “Setting Up Subscription Reports.”

1.4 Route Optimization

Note: *This feature is new for AT&T accounts and requires a subscription. For more information on adding this feature, contact your AT&T or TeleNav Track representative.*

With TeleNav Track's Route Optimization, you can determine the best job order sequencing for multiple jobs to be completed on a route. You can set up jobs on the website, determine the order in which they should be performed, and send it to drivers' handsets or print out copies to be distributed to drivers before they start their route.

For more information, click on the Support tab of the TeleNav Track Website and search on "Route Optimization."
